

To save time and money, the new iForks Pro (B-Series) wireless weighing attachment by Cascade combines load transport and weighing into a single step. Installed in minutes, the unit provides the ability to view and track the weight of individual loads and total weight of multiple loads. Each wireless unit transmits information to its backlit LCD display using Bluetooth technology.

Features include a sealed rechargeable battery pack, chisel tip forks with vibrant yellow inserts, wireless and digital fork calibration, automatic low-voltage shut off, and compatibility with fork positioners.
