

APPLICATIONS

Cascade offers a number of fork mounted spreaders. These designs allow the lift truck operator to efficiently carry wide loads with a high level of stability. Lengths of pipe, flexible board, and metal extension can all be moved without excessive flexing. Quickly and efficiently increase the usable fork spread and number of forks being used. Available with or without load backrest. The standard finish on this attachment is painted yellow or a zinc finish.

SPECIFICATIONS

SWL	3000kg
Load Centre	600mm
H C of G	300mm

FEATURES & BENEFITS

- Painted finish in high-visibility yellow.
- Easy use safety retaining chain.
- Supplied with rating plate and user manual.
- Load backrest to support larger loads
- Usable fork length 1100mm

Note: Designed in accordance with AS2359, the central slippers should be no longer than 167% of the supporting lift truck's tyne length. If the slippers are longer than this, their use shall be restricted to their specified application. All lift truck attachments affect the safe working load of the truck. End users should consult their equipment supplier to ensure the lift truck is rated for use with these attachments.
