

Fork Positioners

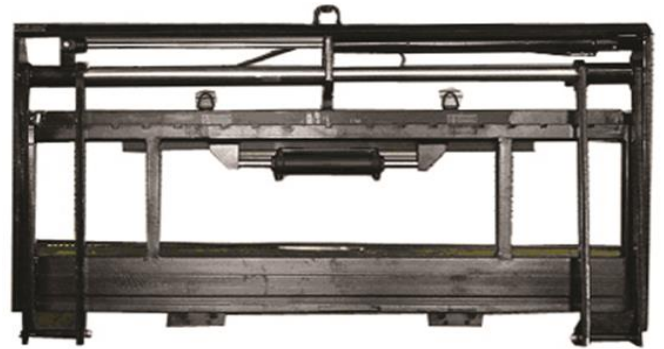

LBFP series.

The Handling Systems LBFP is an excellent solution for hire fleets or forklifts that come with factory integral sideshifts. The LBFP provides a robust solution for hydraulic fork positioning in a compact package. Simply replacing the forklifts standard load back rest this product provides excellent performance with minimum impact to truck capacity.

HSFP series.

The Handling Systems HSFP series is a heavy duty solution for forklifts in the 5 tonne and above range. The HSFP fork positioner is fully welded to the truck carriage or sideshift and provides a robust no nonsense fork positioner for tough applications and rough environments. Truck capacity and operator visibility have been maintained through smart design and the use of high strength well positioned material.

Integral sideshifts & fork positioners

Handling Systems Australia

offer a full range of integral sideshifts and sideshift fork positioners for all machine types and capacities. The integral design ensures minimal impact to machine capacity by providing an attachment with minimal structural thickness and reduced weight when compared to conventional hang on attachments.
