

Efficiently Rotate High Capacity Loads

APPLICATIONS

100G Rotators are designed to give your driver the best possible visibility while quickly inverting loads. Ideal for foundries, machine shops and raw material industries where there is a necessity to efficiently dump or rotate high capacity loads.

FEATURES

- Proven Rugged Construction- Cascade's gear drive box and ring gear design have been proven to provide superior service life.
- Visibility- The G series Rotators have cutout mid sections allowing for superior visibility.
- Rotational Torque- High torque motor, ensures smooth, positive rotation of the load.
- Forks- Rotators may be ordered with standard forks, custom forks or without forks.

OPTIONS

- 180° Rotation Stop Group- Used when stopping rotation at precisely 180° is desirable.
- Customizable fork bars- Allowing for application specific fork spread.
- Quick-change Lower Mounting Hooks- Allow the rotator to be removed or installed in a matter of minutes without tools. (Quick-change hydraulic couplers available separately)
- Bin Retainer- Custom designed to clamp on top of bin to hold bin in place while rotating. Typically used when bin does not have fork pockets.
- Special fork sizes and configurations available.
- Side Stabilizers
- Fork Side Restraints
