

*Increase load
inverting
productivity and
decrease product
damage with the
added ability of
fork positioning*

Add fork positioning capability to your rotator

APPLICATIONS

G-Series rotators give your driver the ability to quickly dump or invert a load, then immediately return the forks to the pick-up position in one continuous motion. Coupled with fork positioning ability allows the driver to accurately position the forks from the driver's seat for handling a wide variety of pallets or bin configurations. Commonly found in food processing, automotive manufacturing, chemical processing, recycling operations and general manufacturing.

FEATURES

- High torque - 360° rotation with induction hardened gears
- Fast operating speed for improved productivity
- Large visibility window and sleek profiled back plate provides an excellent view of the fork tips
- Smooth, even fork travel

OPTIONS

- 180° rotation stop group
- Custom fork sizes
- Custom fork bars for application specific fork spread
- Quick release lower hooks
- Hydraulic bin hold down
