

The Handling Systems Australia heavy duty safety work platform offers a solid and secure platform to carry out routine maintenance. The fully welded construction provides a robust attachment for rugged applications and comes complete with fully welded harness points.

## FEATURES

- Fully welded construction for heavy duty applications
- Anti-slip checker plate floor.
- Two floor mounted harness points.
- Enclosed meshed frame.
- Inwards opening self closing gate.
- Internal handrail set 50mm below the sides.
- Duplicate independent locks to attach platform to forklift.
- Certified Australian Made.

## SPECIFICATIONS

- Capacity 250kgs – two man.
- Weight 190kgs.
- Pocket size 155mm x 55mm – C/L spread 540mm.
- HC of G: 466mm
- VC of G: 435mm
- Lost Load: N/A

## DESIGN NOTE

AS2359.1 states that the forklift trucks used with work platforms shall comply with the following requirements. The rated capacity of the forklift truck shall be equal or greater than the following;

- For counter balanced trucks, 1800kg or 5 times the combined mass of the platform and the rated load, which ever is the greater
- For reach trucks (retractable mast or fork arms shall be fully retracted) and straddle trucks, 1000kg or 3 times the combined mass of the work platform and the rated load, which ever is the greater.

## CUSTOM SOLUTIONS

The HSWP series of fully welded safety work platforms meet a range of different applications, designed and fabricated in accordance with AS2359.1. Ask us today about your custom solution today.
