

High capacity rotators for the toughest applications.

APPLICATIONS

Heavy duty, high capacity D-Series Rotators provide your driver with the ability to quickly dump or invert many loads easily and precisely. Cascade high capacity rotators are widely used in automotive manufacturing, chemical processing, recycling operations, smelting and casting operations—anywhere it is necessary to dump or rotate large capacity loads.

FEATURES

- **Rugged Construction**—Cascade's gear drive box and ring gear design are proven to provide superior service life.
- **Visibility**—The drive box and motor are positioned behind the baseplate to provide maximum visibility for the forklift driver.
- **Visibility window**—for good second tier visibility.
- **Rotational Torque**—Excellent torque specifications ensure smooth, positive rotation of the load.

OPTIONS

- **Special fork sizes and configurations.**
- **Side stabilizers.**
- **Forkbar Width**—Many forkbar widths are available to suit a wide variety of applications.
- **Forks**—Rotators may be ordered with forks or with forkbars only.
- **Heavy-duty Faceplate**
