

APPLICATIONS

Cascade manufactures a range of bins for the collection and disposal of waste materials and liquids, from self-tipping bins to bins that are operated by the forklift driver. All of these bins have a forward rolling action with the roll over bin being a 4-way entry to allow side tipping. It also has a unique cutaway front opening making it suitable for tipping fluids. The driver release models have a cord operated release mechanism.

These bins come standard in H.D. Galvanised finish.

FEATURES

- Crane lugs fitted to the 15A-MDB-A01, A02 and 10A-MDB-A03
- Drain plugs are fitted as standard.
- Wheels optional
